

ABSTRACT OF THE DISCLOSURE

An initiator assembly for an inflator device having at least one inflator device mating lug. The initiator assembly includes an initiator having an initiator cup at least in part defining a storage chamber containing a reactive charge. The initiator also includes at least one electrical connector in reaction initiating communication with the reactive charge. The initiator assembly has a molded body fitting over at least a portion of the initiator. The molded body includes at least one locking flange that is adapted to lockingly engage the at least one inflator device mating lug.
